An average household would need to spend **£9,167 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £4,058 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 68,409 kWh per year for heating
 - 3,090 kWh per year for hot water
